

Empathy Map

Date	15 March 2024
Team ID	SWTID-2026-7446
Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I have great story ideas, but I can't draw. • I wish I could turn my idea into a comic in minutes. • Can I make it funny or anime-style instead?	THINKS • Will the AI understand my story and my character? • Will the panels match my chosen art style? • Can I change tone or style without starting over?
AARAV <i>(Hobbyist Storyteller / Non-artist Creator)</i>	
DOES • Searches for AI comic and story generator tools. • Enters a prompt, character, setting, tone and art style. • Re-submits with a new tone or style, then downloads the PDF.	FEELS • Frustrated by lack of drawing skills and time. • Excited to see the idea come alive. • Proud and satisfied when the final PDF is ready.
