

COMMUNICATION

Date: 15 March 2026

Team ID: SWTID-2026-7446

Project Name: ComicCraft - AI Comic Story Creator using Gemini Models

Communication Plan

Effective communication is essential for the successful development and demonstration of ComicCraft. The team uses regular communication to coordinate AI model integration, FastAPI backend development, frontend work, testing, deployment, issue resolution, stakeholder reviews, and final demonstration activities.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	Team meeting / Chat	Project Team	Discuss daily tasks, progress, blockers, and next steps.
2	Progress Update	Weekly	Team meeting / Project Plan	Project Team	Review milestone progress in model selection, backend, frontend, and deployment.
3	Issue / Bug Discussion	As Needed	Chat / VS Code / Git	Developers & Testers	Identify, discuss, troubleshoot, and resolve technical issues.
4	Stakeholder Review	Bi-Weekly	Demo / Meeting	Project Team & Stakeholders	Review generated comics, UI, AI workflow, and collect feedback.
5	Final Demo Rehearsal	Once	Demo meeting	Project Team	Verify the complete comic generation, preview, PDF export, and presentation.

Communication Challenges & Resolutions

S.No	Challenge Faced	Resolution / Action Taken
1	AI model/API availability or temporary service downtime	Implement fallbacks, monitor status, and retry requests at a short interval, verify API configuration, and keep the AI integration modular so issues can be isolated.
2	Image generation setup and dependency complexity	Use a containerized or isolated environment and keep image generation in a separate module so the backend logic remains clean.
3	Coordinating story, images, layout, and PDF export	Use separate functions/modules for outline generation, story generation, image generation, layout generation, and PDF export.
